GYTPOL

Device Security Posture Management

Say goodbye to misconfigurations and hello to peace of mind

Happy IT
Happy CISO
Happy SecOps
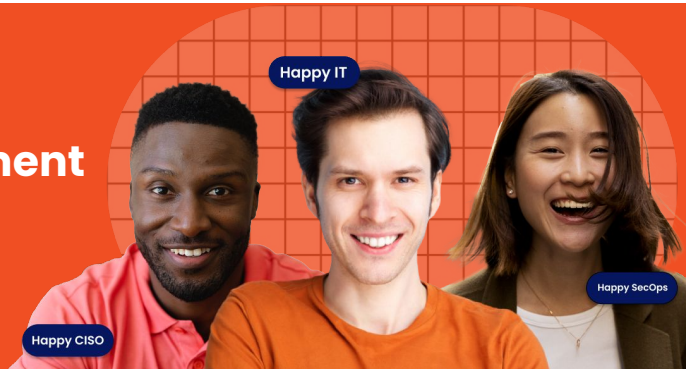

Extraordinary visibility of your device security gaps with AUTOMATIC REMEDIATION and Zero Impact.

◼ ELIMINATE DEVICE MISCONFIGURATIONS IN A SNAP

Human Errors

Default Settings

Non-Patchable Vulnerabilities

◼ ENHANCE PRODUCTIVITY THROUGH AUTOMATION

Auto Remediation

Zero Impact

Interoperable

◼ SMARTER, FASTER & RELIABLE

A **next generation** solution which finds & fixes security gaps & blind spots on devices due to misconfigurations. Allows organizations to strengthen their security posture within minutes by replacing costly and error prone manual methods.

◼ DON'T ASSUME, KNOW FOR SURE

Full & **continuous visibility** of **misconfigurations** that disrupt and put your organization at risk. Workstations, Servers (Windows, Linux, macOS), Network Devices & IoT Devices.

◼ BEYOND DETECTION, REMEDIATION

Instant mitigation leveraging **Automatic Remediation with Zero Impact & Revert**. Simple, rapid, effective.

◼ GYTPOL BENEFITS

▪ **CONTINUOUS DETECTION** using a super lightweight semi-agent approach.

▪ **VISIBILITY OF IMPACT** Analyzes potential impact before you remediate.

▪ **AUTOMATED REMEDIATION** Self-healing maintains a continuous hardened baseline for existing and new devices.

▪ **ROLLBACK** If required, ability to revert quickly to the previous misconfigured state.

▪ **INTEGRATED AND INTEROPERABLE** with SIEM and Ticketing Systems and other applications through robust APIs.

▪ **DETECTION OF NON-APPLIED POLICIES**, orphaned policies and local policies.

▪ **COMPLIANCE FRAMEWORKS** including CIS and NIST.

▪ **CONTINUAL RESEARCH** of new and trending misconfigurations being exploited by threat actors .
