Full-Stack Cloud Platform

We enable Service and Software Providers (HSPs, MSPs, CSPs, ISVs) to build and grow their own **profitable cloud business**

By providing extensive portfolios of **IaaS**, **PaaS**, and **XaaS products**

With the **fastest time to market**, the **greatest ease of use** and **maximum profitability**

As a **better alternative** to the large hyperscale clouds to help them **win new customers** and **grow efficiently**

"

"We had to make sure our cloud partner is the best on the market, the most reliable solution we can provide. We chose Virtuozzo... Virtuozzo knows the hosting and cloud provider mind-set, what we need and what our customers need"
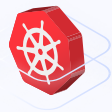

Tim Timrawi
CEO
SHARKTECH

Extensive Solutions Portfolio

Virtuozzo solutions enable all popular IT as a service use cases. They can be installed on-premises and are also available as hosted services from Virtuozzo, Virtuozzo partners and from a range of public cloud providers.

Infrastructure as a Service
OpenStack-based platform fine-tuned for cloud-native apps, AI/ML projects and GPU workloads.

Platform as a Service
Elastic, containerized cloud with automatic scaling, clusterization and CI/CD integration.

Kubernetes as a Service
High-performance Kubernetes clusters with automated provisioning, scaling and updates.

Database as a Service
Automated database provisioning, clustering, scaling & updates for your customers.

WordPress as a Service
High performing WordPress installations with automated scaling and clustering.

Multi-Cloud Management
Unified application management across multiple clouds with full interoperability

S3 Storage as a Service
Scalable S3-compatible object storage for your projects.

Backup as a Service
Backup and disaster recovery powered by Acronis Cyber Protect Cloud.
